DuPage County Public Works Overhead Sanitary Sewer Program

- This program is for residents directly connected to the DuPage County Sanitary District Systems. It is intended to replace a home's gravity sewer system to an overhead sanitary sewer so that future sanitary backups can be prevented.
- Contact our office at 630-407-6800 for an inspection.
- We will inspect the home to see if it qualifies for the program.
- A solution will be discussed; the County will only pay for sewer related work, NOT remodeling of the basement.
- The owner must obtain local building permits for the plumbing. Check with Township to see if you need a permit from them.
- A licensed plumber must perform the work.
- The local building department will inspect the work and approve it, and then our inspector will re-inspect to approve the work.
- The owner pays the plumber the full amount, and will submit to the County, all receipts from the plumber for a rebate.
- All receipts must have a list of itemized labor and material costs.
- Our Financial Services Manager will review the receipts and issue a check to the customer.
- Homeowners who are in our sewer maintenance area will be reimbursed the first \$2,000.00 of their bill. Thereafter 50% of the remaining bill will be paid up to \$3,000.00 for a total maximum payout of \$5,000.00.
